Hey 4D!

We have the ability to set help tips...

```
OBJECT SET HELP TIP(*;"Variable";"I am the walrus.") |
```

and we can use styled text...

How about styled text in help tips?

Important: *Attention!*

It'd be a lot cooler if you did...

Feature Requests/Voting

⌘ My Home ⌘ Forums ⌘ Posts ⌘ Members ⌘ Groups ⌘ Bugs ⌘ Hotfix (new)

[My Home](#) > [List of posts](#) > [Public forums](#) > [Features requests](#)

<http://forums.4d.fr/Forum/EN/1075213/0/0>

Voting on a feature request is accomplished by using the star rating system on the original post for that particular feature.

Compiler: Compile to a separate file: not into source project
Sent on : 2012/12/19 - 02:53ÉPM

Average: (9 votes)

Rate this:

[Reply](#)

REQUEST:

Allow an option when compiling, to create a destination - compiled only file, like in the old days with the separate compiler application, and NOT put the compiled code into the source .4db file.

BENEFITS:

I do frequent backups of my source file. When compiling, and with 64-bit turned on, my source file becomes 4 times larger. I would much prefer to not explode the size of my source file with the compiled code.

The star rating system has 4 options:

- 1 = Bad
- 2 = Average
- 3 = Good
- 4 = Excellent

Select the number of stars you feel the feature request deserves to cast your vote:

Average: (9 votes)
